

It appears that Commissioner Powell is not listening to the consumer and only has the major broadcasters interests in his agenda to further diminish the quality of news this country is getting now. It's no wonder that during the Iraq invasion, many of us turned to foreign news sources for some iota of truth. Watching Mel Karmazan whine & lie about how the broadcasters are making no money was a joke. I remember how much they pay Karmazan and other top officials at the broadcasting companies. One can only imagine, how much money Michael Powell will make when he leaves this Civil Service job for the real bucks at the broadcasters who he helped make billionaires.
